SPECULATORS BITTEN.

Congressmen Who Bought Up Silver Are Unable to Unload Their Purchases.

CHICAGO, October 21.—The News' Washington special says: There is a painful rumor in circulation here to the effect that members of Congress who went into a pool for the purchase of a large quantity of silver before the bill passed have been unable to dispose of their holdings and are likely to carry them some months before it reaches the quotations of a month or six weeks ago. It is understood that the pool represents 10,000,000 ounces of silver, purchased at prices ranging from \$1.04 to \$1.10. After the passage of the act, quotations ran as high as \$1.19, but the speculators in New York unloaded so rapidly and so much metal was shipped to this country from England that the market was flooded and the Congressmen were unable to dispose of the large quantity they had purchased.

AN ARIZONA MAN

EL PASO, Texas, October 21.—G. G. Blanc, a Frenchman from Hudson's Hot Springs, Arizona, arrived here last Friday with a paramour, a notorious sporting woman, of Silver City, N. M. This morning the inmates of the hotel heard shots, but were unable to locate them. At 11 o'clock the chamber maid tried to get into Blanc's room. No answer coming she looked over the transom and saw the dead body of Blanc and the woman. Investigation showed he had killed the woman and then suicided. They had been drinking heavily, but outside of this no cause is known for the deed.

Wandering Utes.

HOFF, OF TUCSON!

BELOW IS A CUT OF THE TERRITORIAL RENOWNED CHARLES F. HOFF, COMMONLY known as HOFF, OF TUCSON. Mr. Hoff is Manufacturer's Agent and Merchandise Broker, with headquarters at Tucson. He is the gentleman that has agitated the windmill question so much, the results of which are being seen all over the Territory, and which is turning the barren deserts into blooming gardens.

THE AERMOTOR WINDMILL

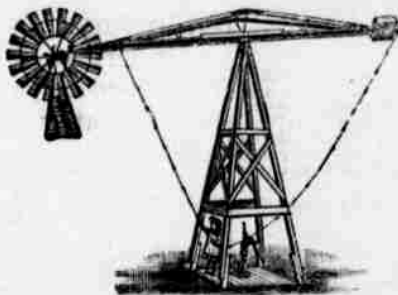

Shows an increase of 25 per cent in power over all other mills. The wheel is entirely of STEEL.

Sun, Rain or Storm therefore have no effect on the same.

It is sold with or without TILTING TOWERS. FIXED TOWERS are the cheapest, but the TILTING TOWER is the most convenient; same brings the wheel down to the ground for oiling.

Think of it: the wheel comes down to you.

The AERMOTOR has from 4 to 16-inch strokes. Three revolutions of the wheel to one stroke of the pump allows it to start up under a heavy load, and runs when other wheels are idle, not being "quite" sufficient wind to run other mills. The wheel itself being so LIGHT, runs so much faster when started, and thus gains more in speed than it loses in the stroke. But these are only a few reasons why the AERMOTOR is superior in Power, Construction and Durability to all other wind-motors. However, so far as the power of the wheel is concerned, the greatest

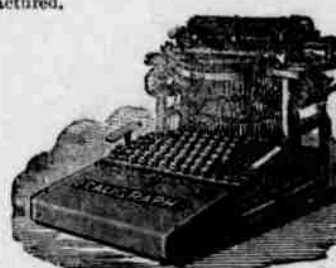

gain in power is due to the structure of the wheel itself. To specify ALL the reasons for this would be too tedious. Suffice it to say that this claim is based on numerous dynamometric tests on more than sixty different wheels, and that the AERMOTOR has been submitted to long and applied practical tests, in conjunction with the leading wind-motors of the country, and it has been proven by actual trial and measurement that the 8-foot Steel AERMOTOR will pump more water in the same time, in any kind of wind, and will do the same work in lighter wind than the best of 10-foot wooden wheels made. The AERMOTOR WIND ENGINE, without exaggeration, is the greatest invention of the nineteenth century, and every home in Arizona should have one, as a home without a windmill is like a library without books, a home without a soul.

CHARLES F. HOFF, Agent, Tucson, Arizona.
